

I feel closed captioning has come a long way but we still have a long way to go. All news broadcasts should be captioned. I still see alot of them just using the teleprompter in place of realtime captioning. I have a right to read what hearing people are hearing. That includes all jokes and conversation from the news anchors. I also have a right to know what is being said in the pre-newscast teaser. Some of the pictures shown are frightening when you don't know what is happening and where. Weekend news captioning is unreadable. I have decided this must be the time that the student captioners are practicing or they use the poorest typest at this time. This is really frustrating to read commentary that doesn't have real words or fully typed words. The captioning of entertainment programs is also important to me but not as important as the news. This is especially true now that our country is having threats of terror. Please continue to perfect this most important form of communication.
